

# NOISE INFORMATION SYSTEM (NIS) SGL CARBON GROUP, MEITINGEN

CLIENT	SGL Carbon Group
CONTRACTOR	ACCON GmbH
PROJECT DURATION	since 1990

## PROJECT DESCRIPTION

The core business of the SGL Carbon Group is the production of graphite electrodes for steel manufacturing. The company has plants and business markets all over the world. The industrial plant exists in Meitingen since 1922. Besides the core business, carbon based products are being developed and produced e. g. carbon fiber components and highly efficient braking discs.

The plant noise information system (NIS), which is designed by ACCON is used by the client to make statements on the noise control at any time.

ACCON GmbH maintains that the NIS will actuate continuously and will assist with difficult acoustical problems.
